## Acrylic Topcoat X

**ALEXSEAL®**  
Yacht Coatings

### Extra Gloss X Extra Flow

**Acrylic Topcoat X** unites high performance product quality with simple and time-saving application.

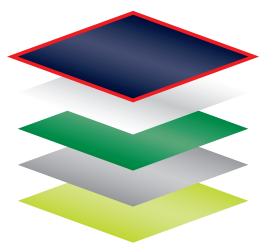

#### FASTER TO FINISH

Using the latest coating technologies available, it offers very high hiding power, fast drying, fast curing and an easy-to-buff and to polish finish. This leads to reduced paint times – because yachts belong in the water, not in the shed.

#### BRILLIANCE MEETS FUNCTIONALITY

The **Acrylic Topcoat X** combines an outstanding gloss and flow level (on a par with polyurethane topcoats) with an outstanding wet-look effect – available in all **ALEXSEAL®** standard colors and with our Color Mix System. The very smooth and hard surface with high abrasion resistance provides robust protection against mechanical damage.

Less corrective work, fewer coats, easy handling and proven application parameters provide a fast and smooth path to a high-gloss finish even under challenging conditions.

**X series**

#### Use of ALEXSEAL® products

Please be note that all ALEXSEAL® products are intended for professional use only and the application process must be carried out by professional users in accordance with the respective material data sheets. The information contained in this data sheet as well as in any ALEXSEAL® material data sheet is based on our level of research and development. Revisal by the user with regard to the intended aim is necessary due to the diverse processing and application possibilities. In case of any doubts regarding the properties and use of our product, please contact your local dealer. Any liability on part of Mankiewicz for faulty applications and / or improper use and any damage arising thereof is expressly excluded whether based on warranty, contract law, torts, negligence, strict liability, misrepresentation or any other area of law except as required by mandatory applicable law.
