

Product Sheet

X-Series vs. Competitor

Why is the Acrylic X-Series better than the competitor?

ALEXSEAL® Acrylic Topcoat X

The ALEXSEAL® range offers a new acrylic urethane topcoat specifically developed for the yacht market. It gives the customers the benefits of excellent application as well as outstanding appearance and longevity.

Gloss Retention

Color Deviation

The Latest Coating Technologies

Using the latest coating technologies available, ALEXSEAL® Acrylic Topcoat X is the most durable, highest gloss and best leveling acrylic urethane finish. After a short drying time it is very easy to polish and also to repair. Due to its fast drying time it is suitable for smaller and medium sized yachts.

Use of ALEXSEAL® products

Please be note that all ALEXSEAL® products are intended for professional use only and the application process must be carried out by professional users in accordance with the respective material data sheets. The information contained in this data sheet as well as in any ALEXSEAL® material data sheet is based on our level of research and development. Revisal by the user with regard to the intended aim is necessary due to the diverse processing and application possibilities. In case of any doubts regarding the properties and use of our product, please contact your local dealer. Any liability on part of Mankiewicz for faulty applications and / or improper use and any damage arising thereof is expressly excluded whether based on warranty, contract law, torts, negligence, strict liability, misrepresentation or any other area of law except as required by mandatory applicable law.

Benefits X-Series

- New and superior resin technology (the competitor's ones are 25+ yrs old)
- Wide color range (same as polyester)
- Better abrasion resistance
- Better gloss retention
- Two coat coverage
- More coverage area per mixed gallon
- Excellent buffing properties
- Easier to buff, blend and repair
