

# Product Sheet

## Super Build 302

### More process reliability thanks to new shade

Experience the process innovation of ALEXSEAL® Super Build 302, making your application process easier.

#### Yellow Instead of White

The visual differences in surfaces will ease and improve the application process. That is why the color of the ALEXSEAL® Super Build 302 has been adjusted from White to a Yellowish shade.

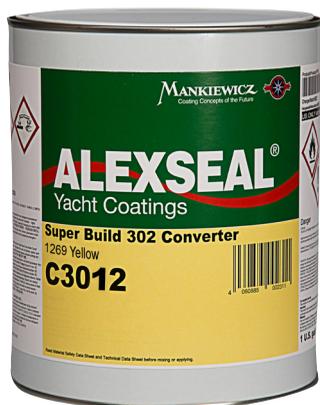

This makes it easier to differentiate the Super Build 302 from the ALEXSEAL® Finish Primer 442. Furthermore, the yellow color of the ALEXSEAL® Super Build 302 improves the visibility of sand-through spots in the White ALEXSEAL® Finish Primer 442.

#### Easy to Handle

After mixing the new ALEXSEAL® Super Build 302 Converter (Yellow) with the ALEXSEAL® Super Build 302 base (White), it will result in a light yellow color on the final surface. In addition, the new solvent combination of the product ensures safer usage for our customers.

#### Smooth Transition

The Super Build 302 Converter Color White will be available until the end of 2024 to allow all customers a smooth transition.

#### Use of ALEXSEAL® Products

Please be note that all ALEXSEAL® products are intended for professional use only and the application process must be carried out by professional users in accordance with the respective material data sheets. The information contained in this data sheet as well as in any ALEXSEAL® material data sheet is based on our level of research and development. Revisal by the user with regard to the intended aim is necessary due to the diverse processing and application possibilities. In case of any doubts regarding the properties and use of our product, please contact your local dealer. Any liability on part of Mankiewicz for faulty applications and / or improper use and any damage arising thereof is expressly excluded whether based on warranty, contract law, torts, negligence, strict liability, misrepresentation or any other area of law except as required by mandatory applicable law.

### Your Benefits

- Better visual difference between Finish Primer 442 and Super Build 302
- Better visual control of sand-through spots in the 442
- Safer solvent combination
