1 NEW DAIWA SAMURAI BRAID

Daiwa's new Samurai Braid offers distinct performance advantages that will help you cast farther, detect the slightest of bites and catch more fish. Saltwater anglers will appreciate the combined strength and sensitivity of this unique eight-strand weave braid and its super thin diameter, smoothness, softness and flexibility. The unique qualities of Samurai Braid work together to ensure greater castability, less line noise on the retrieve, and a faster sink rate due to reduced current resistance. In addition to enabling long, trouble-free casts and allowing you to get your bait or lure in the strike-zone quickly, it has virtually zero stretch. It's available in pound-tests ranging from 15 to 150 and anglers can choose from 150-yard, 300-yard and 1500-yard filler spools.

For more information, call Daiwa (562) 802-9589 or email info@daiwa.com www.daiwa.com

2 TIGER SHARK LINERIGGER TOP MOUNTS

Tigress Trading announces the addition of two new and revolutionary top mounts offering the first true below top, one-man operation of its kind, and the ultimate in high performance top mount outrigger holders that will enable the user to deploy, raise, lower and retrieve your top mount holders simultaneously all in one easy step. With a simple motion, in only a matter of seconds you can make adjustments to clear bridges and/or low clearance obstacles, increase the height of trolling lines, or quickly adjust your outriggers to maximum bait spread. These two new "Tiger Shark LineRigger" Top Mounts are designed for easy hand operation with the Tiger Shark II Model or effortless electronic deployment with the Tiger Shark I Model.

For more information, call Tigress Trading (954) 462-0917 or visit www.tigressoutriggers.com

3 GILL'S NEW BREATHABLE BOOTS

Gill is introducing new Breathable Boots for men and women with unisex sizing that offer the utmost in breathability on the market today, combined with lightweight comfort and outstanding grip for any boating adventure. "We've used an extremely breathable, taped eVentR membrane called a 'vent,' to create boots that are extremely dry and comfortable to wear," said David Pritchard, Gill North America president. "Our wearers will enjoy great-fitting boots that are waterproof, with flexible VibramR soles for extra, better traction on flat decks or on 30-degree angled surfaces." The VibramR, molded, rounded boot sole has superb water dispersion qualities and a three-dimensional grip, gripping on the side, the heel and the toe of every boot, giving wearers a strong, very secure grip on any terrain.

For more information, call Gill (770) 945-0564 or visit www.gillna.com

4 ALEXSEAL® NEW FINISH PRIMER

After its initial product rollout in the U.S., Alexseal Yacht Coatings expands its product line with the addition of ALEXSEAL® Finish Primer 442. ALEXSEAL® Finish Primer 442 is an epoxy-based finish primer offering advanced adhesion qualities over various substrates, exceptional sanding characteristics, and an improved film build. It is designed to prime and seal old and new, properly prepared, stable surfaces such as gelcoat and fiberglass, as well as to seal other Alexseal® primers and filler systems. Alexseal® Finish Primer 442 is also designed to cure at cooler temperatures. Using this primer as a base enhances the "Wet Look" of Alexseal's Topcoats. Finish Primer 442 may be used above and below the waterline.

For more information, call Alexseal at (314) 783-2110 or visit www.alexseal.com

5 MARLIN-X OFFERS REVOLUTIONARY BILLFISH TEASER

After two years of research and development, Marlin-X has created a life sized teaser that looks and swims like an actual feeding billfish. The teaser is manufactured with marine-grade materials, computer designed and computer machined for perfection. The teaser is easier to use than the common mullet dredge and can be pulled from well-maintained teaser reels at trolling speeds ranging from three to eight knots. Even more, if the teaser becomes disconnected from the boat, it will not sink! This teaser will certainly create competitive action in a trolling spread! Available in Sailfish and all Marlin species.

For more information call Marlin-X (757) 453-6279 or e-mail marlin-x@cox.net www.marlin-x.com
